Memo to File

Re: Energy Fuels Nuclear
Uranium Mines
ACT/037/015

Mr. Dave Markley of Energy Fuels Nuclear called the division on the afternoon of August 23, 1978 to inquire about the status of the Hillside - Gizmo - Maybe Mine. Mike Thompson informed him that the mine plan appears to be in good shape and a commitment to Rule M-10 had been made. Therefore, the plan should be reviewed and possibly approved in the near future. The present delay is due to the division's priorities of coal plans over uranium due to O.S.M. regulations.

Mr. Markley stated that Energy Fuels Nuclear has hired Mr. Steve Ogden, P.O. Box 787, Blanding, Utah 84511, 678-2224, to coordinate activities between governmental agencies and mines owned by Energy Fuels Nuclear but leased to others.

Mr. Markley requested that copies of good mining and reclamation plans be forwarded to him at Energy Fuels Nuclear's Denver address so that he could use them for models for upcoming plans.

K. MICHAEL THOMPSON
ENGINEERING GEOLOGIST
